

## City of Sammamish

### Solicitation for Professional Services

#### City of Sammamish – On-Call Construction Management Services Contract

The City of Sammamish Department of Public Works is initiating up to two construction management services contracts for their 2021-22 budget cycle. On March 11, 2021, City staff will review consultant Statement of Qualifications (SOQs) located on the Consultant Services Roster of the MRSC (Municipal Research and Services Center, [www.mrscrosters.org](http://www.mrscrosters.org)). The City will not review Statements of Qualifications or other documents directly submitted to staff.

Staff will review SOQs for at least five consultants listed on the MRSC roster. If you would like your firm to be considered, please email Stephanie Sullivan at [ssullivan@sammamish.us](mailto:ssullivan@sammamish.us) to inform the City of your firm's interest.

SOQs will be reviewed and up to two firms may be selected for construction management services. General scopes and scoring criteria are posted on the City of Sammamish webpage at [www.sammamish.us/solicitations](http://www.sammamish.us/solicitations).

These contracts are not a guarantee of work; work will be created through individual task orders. The first task order anticipated will be for construction management services on the Ebright Creek Fish Passage project. One or more of the contracts may not be awarded. The contracts are expected to last through 2022 with up to two additional 1-year contract extensions. Maximum potential contract duration is four years.
