

Ebright Creek Park, 1317 212th Ave SE, Sammamish, WA 98075

PROTECT

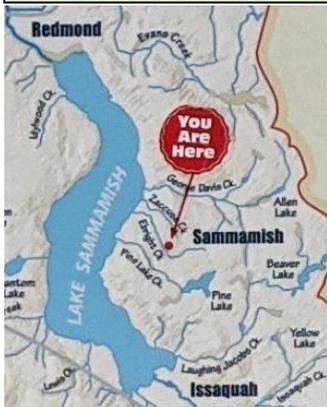

The City of Sammamish has been a certified Community Wildlife Habitat since 2011. In 2014 Washington Native Plant Society Stewards with the help of community work parties began to remove invasive plants such as Himalayan blackberry, and replanted with native species.

By providing adequate food, shelter, and water sources, the native forest restoration created habitat for wildlife. Initially plants in the pollinator garden were chosen to provide pollen and nectar throughout the growing season. As the forest canopy and shade increased over time, the pollinator garden was transitioned into a forest edge garden. Animal pollinators are needed for the reproduction of 90% of flowering plants - a crucial link in the survival of all life on earth.

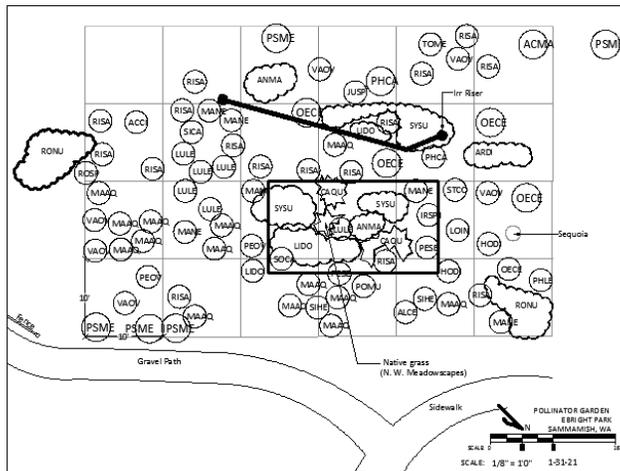

Experimental planting of non-native coastal redwoods may help to ensure their survival as their own natural habitat becomes too warm.

Ebright Stream is one of the few known spawning areas for the Kokanee salmon, now verging on extinction. Young Kokanee, before returning to Lake Sammamish, depend on the cool, clear water of the creek. Restoring the area to native forest protects both the creek and its inhabitants.

EBRIGHT FOREST EDGE GARDEN

Code	Common name	Scientific name			
TREES					
--conifers					
ABGR	grand fir	<i>Abies grandis</i>			
PISI	Sitka spruce	<i>Picea sitchensis</i>	SARA	red elderberry	<i>Sambucus racemosa</i>
PICO	shore pine	<i>Pinus contorta</i>	SYAL	snowberry	<i>Symphoricarpos albus</i>
PSME	Douglas-fir	<i>Pseudotsuga menziesii</i>	VAOV	huckleberry	<i>Vaccinium ovatum</i>
SESE	coastal redwood	<i>Sequoia sempervirens</i>	VAPA	red huckleberry	<i>Vaccinium parvifolium</i>
THPL	western redcedar	<i>Thuja plicata</i>			
TSHE	western hemlock	<i>Tsuga heterophylla</i>			
--broadleaf					
ACCI	vine maple	<i>Acer circinatum</i>			
ACMA	bigleaf maple	<i>Acer macrophyllum</i>			
ALRU	red alder	<i>Alnus rubra</i>			
SHRUBS					
GASH	salal	<i>Gaultheria shallon</i>			
HODI	oceanspray	<i>Holodiscus discolor</i>			
LOIN	black twinberry	<i>Lonicera involucrata</i>			
MAAQ	tall Oregon grape	<i>Mahonia aquifolium</i>			
MANE	dull Oregon grape	<i>Mahonia nervosa</i>			
OECE	osoberry	<i>Oemleria cerasiformis</i>			
PHLE	Lewis' mock orange	<i>Philadelphus lewisii</i>			
PHCA	Pacific ninebark	<i>Physocarpus capitatus</i>			
RISA	red flowering currant	<i>Ribes sanguineum</i>			
RONU	Nootka rose	<i>Rosa nutkana</i>			
RULE	blackcap raspberry	<i>Rubus leucodermis</i>			
RUPA	thimbleberry	<i>Rubus parviflorus</i>			
RUSP	salmonberry	<i>Rubus spectabilis</i>			
RUUR	trailing blackberry	<i>Rubus ursinus</i>			
			HERBACEOUS		
			ALCE	nodding onion	<i>Allium cernuum</i>
			ANMA	pearly everlasting	<i>Anaphalis margaritacea</i>
			ARDI	goat's beard	<i>Aruncus dioicus</i>
			ASSU	Douglas Aster	<i>Symphyotrichum subspicatum</i>
			CAQU	common camas	<i>Camassia quamamas</i>
			IRSP	Iris sp.	<i>Iris sp.</i>
			JUSP	Juncus sp.	<i>Juncus sp.</i>
			LIDO	meadow foam	<i>Limnanthes douglasii</i>
			LULE	large leaf lupine	<i>Lupinus lepidus</i>
				broad leaved	
			PEOV	penstemon	<i>Penstemon ovatus</i>
			PESE	coast penstemon	<i>Penstemon serrulatus</i>
			POMU	sword fern	<i>Polystichum munitum</i>
				Henderson's checker-	
			SIHE	mallow	<i>Sidalcea hendersonii</i>
			SICA	Yellow eyed grass	<i>Sisyrinchium californicum</i>
			SOLE	Canada goldenrod	<i>Solidago canadensis</i>
			TEGR	fragrant fringe cup	<i>Tellima grandiflora</i>
			TOME	piggy back plant	<i>Tolmiea menziesii</i>
			TROV	western trillium	<i>Trillium ovatum</i>
